#### Notice to Past Authors of ACM-Published Articles

ACM intends to create a complete electronic archive of all articles and/or other material previously published by ACM. If you have written a work that was previously published by ACM in any journal or conference proceedings prior to 1978, or any SIG Newsletter at any time, and you do NOT want this work to appear in the ACM Digital Library, please inform [permissions@acm.org](mailto:permissions@acm.org), stating the title of the work, the author(s), and where and when published.

## Preface

These proceedings contain the refereed papers, posters and abstracts of keynotes, tutorials and panel discussion presented at the Fourth International Conference on the Theory of Information Retrieval (ICTIR13), held in Copenhagen, Denmark, during September 29 - October 2, 2013.

ICTIR is held biennially under the auspices of BCS-IRSG and attracts the latest advances in theoretical and formal Information Retrieval (IR) research. As of this year, ICTIR is also held in cooperation with ACM SIGIR. Previous editions of ICTIR were held in Budapest, Hungary (October 2007), Cambridge, UK (September 2009), and Bertinoro, Italy (September 2011). We are very happy to bring ICTIR13 to Denmark, a country with a long history in IR. Continuing the formal tradition of the previous conference editions but also looking into the future of the area, for the first time ICTIR includes tutorials, a panel discussion, as well as a strong international (as opposed to mainly European) presence in its organisation and participation by leading researchers from both academia and industry.

The 11 full papers, 7 short papers, and 5 posters presented at ICTIR13 were carefully reviewed and selected from 51 submissions. The acceptance rates were 29% for full papers, 48% for full & short papers, and 57% for posters. Each submission was subject to a double-blind reviewing process by at least three program committee members. The technical program covers a wide range of areas, including evaluation, ranking, relevance feedback, context, diversification, recommender systems and temporal and thread search. For the first time, the highest share of the work presented at ICTIR is contributed from North America (36%), followed by the UK (21%), and the rest of the world. The participation of five students (two from the UK, and the rest from Canada, USA and the Netherlands) was supported through student grants very kindly provided by Google and ICTIR 2011 surplus. For the first time the technical program includes three keynote talks, two of which are from industry: We thank Ricardo Baeza-Yates (Yahoo! Labs) for his talk on the role of theory in commercial search engines; Dominic Widdows (Serendipity) for his talk on compositional vector semantics; and Keith van Rijsbergen (University of Cambridge) for his talk on the roots of the theoretical basis for IR. We hope that these keynote talks, which cover a range of different core aspects of theoretical IR, will inspire both junior and senior researchers alike and drive further research in the area.

We thank the program committee of papers, posters, tutorials and best paper award for their time and high-quality discussions and feedback to all authors. We also thank Massimo Melucci for his initial work as program committee co-chair, and BSC-IRSG member Jun Wang for his efforts, ideas and support. We especially thank Casper Petersen, the local organisation chair & website designer, Toine Bogers, the local entertainment chair, and the student volunteers. Finally, we are deeply thankful to the following sponsors and supporters for contributing in making ICTIR13 a success:

- Sponsors: Google, Yahoo!, LARM Audio Research Archive, Spinque, Findwise, the Department of Computer Science, the Royal School of Library and Information Science and the Centre for Communication and Computing of the University of Copenhagen.

- Supporters: BCS-IRSG, ACM SIGIR, Wonderful Copenhagen and the editorial staff at ACM for their agreement and assistance in publishing the conference proceedings.

September 2013

General Chairs:

*Christina Lioma*

*Birger Larsen*

*Peter Ingwersen*

Honorary Chair:

*Keith van Rijsbergen*

Program Chairs:

*Oren Kurland*

*Donald Metzler*
